THE BRUSH BUDDY ...

... is a holster for paintbrushes.

PERRIS, CA—Whether one is a Do-It-Yourselfer or a professional painter, the new Brush Buddy is the perfect way to keep the bristles saturated between applications. The holster (holding the paint brush) is hung over the rim of a paint can and suspended within the can. The top of the Brush Buddy is open for easy access and removal of the brush. The bottom of the device has a 1½ inch reservoir to keep the brush from drying out when not in use. Professionals will appreciate this holster because they, as well as amateurs, will never again have to ‘invent’ a method of holding the brush when not in use. The Brush Buddy is designed as a practical and useful device for all painters.

The Brush Buddy was invented by Scott H. and Mark P. of Perris, CA. They said, “This is a great tool for protecting your brush while not painting.” It keeps the bristles straight, even, and saturated during painting so even after taking your lunch break the brush will be ready for you when you return. The specially designed holster will help prevent paint from running up under the metal band when the brush is not in use. The Brush Buddy is easy to use, convenient and efficient.
