TOILET URINAL

Toilet Urinal is simply convenient...

Baltimore, MD— The invention of the Toilet Urinal offers a creative concept for a lightweight portable splash guard for commodes. Manufactured of lightweight thermo-molded plastic, the Toilet Urinal is configured to fit standard toilet bowls. Featuring a plastic base to store the Toilet Urinal when not in use, this product is designed for senior aged men, however it would also be a useful tool when potty training young boys.

The Toilet Urinal was invented by Roger S. of Baltimore, Maryland. He said, “My invention is designed to provide male consumers with a sanitary way to protect the toilet back and surrounding areas when utilizing the facilities. Easy to use and maintain, the Toilet Urinal is designed for home use, but would be ideal for use in hospitals and nursing home facilities, as well.”
