SPRAY CARE 2

Spray Care 2 offers two dispensers in one...

Roosevelt, NY— The invention of the Spray Care 2 offers a creative concept for a design for spray and pump bottle containers, featuring one unit with two separate chambers and dispenser nozzles. Fabricated of a lightweight plastic material, the Spray Care 2 would be configured with a gently contoured shape to make it easy to grip and comfortable to hold.

The Spray Care 2 was invented by Donovan B. of Roosevelt, New York. The idea for this invention was inspired from his experience as a hair stylist. He said, “My invention is designed for professional hair stylists as an effective way to organize their workspace and enhance their efficiency when working with clients. The unique two chamber design would also make the Spray Care 2 an effective product for consumers, making it easier to organize their vanity or shower area.”
