## **STEP N GO**

Step N Go is ergonomically designed...

El Segundo, CA— The invention of the Step N Go offers a creative concept for an ergonomically designed foot pedal to raise and lower a toilet seat. Easily installed as an after market feature on an existing toilet seat, the Step N Go could also be incorporated into the design of a newly manufactured toilet.

The Step N Go was invented by Sal C. of El Segundo, California. He said, “My invention is designed to provide consumers with a convenient, hands free method of lifting and lowering a toilet seat. Not only would the Step N Go provide a more sanitary method for dealing with the toilet seat, but would also offer those with limited mobility a safer and easier method for raising and lowering the seat.”
