CUMMINGS SAFETY CORK

Cummings Safety Cork helps prevent spills...

Fox Lake, WI— The invention of the Cummings Safety Cork offers a creative concept for an attachable cork for bottled beverages, namely beer. The Cummings Safety Cork is designed to prevent insects and other contaminants from falling into a beverage, while also ensuring against accidental spills.

The Cummings Safety Cork was invented by Linda C. of Fox Lake, Wisconsin. He said, “My invention is designed to provide consumers with a simple, yet effective way to keep insects and other debris out of their beverage, especially in the outdoors. Campers, hikers, beach enthusiasts, and concert and sporting activity attendees would all benefit from the Cummings Safety Cork. Having the cork attached to the drink would alleviate the fear of drinking a compromised beverage or bearing the embarrassment of an accidental spill.”
