## **DISABLED VEHICLE WARNING LIGHT SYSTEM**

### Disabled Vehicle Warning Light System

Cerritos, CA— The invention of the Disabled Vehicle Warning Light System offers a creative concept for a mountable light source which is easily attached to a vehicle trunk or positioned on the ground to alert approaching traffic of a potential road hazard. This invention is set to revolutionize the safety accessory product market, offering a user friendly and effective solution to the problem of warning oncoming traffic of a hazardous situation in the roadway.

The Disabled Vehicle Warning Light System was invented by Phillip S. of Cerritos, California. He said, “My invention is designed to warn other drivers of a disabled vehicle or accident location, safely diverting travelers away from the scene. The Disabled Vehicle Warning Light System is effective, economical, simple to operate and has the potential to prevent serious injury and property damage when vehicles are made aware they are approaching a traffic hazard.”
