## **DENTURE CLEANER**

Denture Cleaner provides convenience on the go...

Toms River, NJ—The invention of the Denture Cleaner provides an outstanding concept for consumers who wear dentures or partials. Designed as a double ended tool with a scraper mechanism on one end and a scrubbing brush head on the other, the Denture Cleaner provides denture wearers with a practical and completely portable way to care for their teeth. The Denture Cleaner is designed to effortlessly remove adhesive paste, food particles, and other debris from dentures, resulting in sparkling white teeth and fresh breath.

The Denture Cleaner was invented by Lloyd Clark of Toms River, New Jersey. About his outstanding invention, Mr. Clark states, “I invented the Denture Cleaner as a handy two in one tool that would ensure denture and partial wearers always have a healthy, bright, and fresh smile. Completely portable, the Denture Cleaner is a great traveling companion, and can be easily tucked away in a purse, briefcase, or pocket. The Denture Cleaner easily enables denture wearers the ability to clean their dentures or partials anywhere, at any time, even while on the go.”
