

ABOUT INVENTION PUBLICITY

Invention Resource International offers this free press release service to inventors who wish to publicize their new ideas, new inventions, and new products. Create a press release, and we will publish it on this site free of charge so it can be publicly viewed by reporters, bloggers, media, and new product manufacturers.

SAMPLE INVENTION PRESS RELEASE

The Bed Cover Holder ...

... saves drycleaning and laundering of costly bedding.

NH - The Bed Cover Holder is a convenient and effective means of storing high-end bedding. One simply lifts the bed spread or comforter to reveal the Bed Cover Holder, then pulls out the holder to expose a newly created space for the comforter, pillows and throws.

Rather than placing these costly linens in a corner, on the floor or in a closet, the items are easily folded into place. The product is designed to slip between the mattress and box spring and is made of aluminum with a brushed aluminum or powder-coat finish. It is approximately eight inches high and four feet in depth. The Bed Cover Holder is available for various size beds, such as king, queen, full, and twin. During the day, when the bed is made up, the Bed Cover Holder conveniently slips back under the mattress and is hidden by the bedspread or comforter.
