STORAGE COMPARTMENT FOR LEG SUPPORTS ON WHEELCHAIR

Storage Compartment for Leg Supports on Wheelchair offers convenience...

Baltimore, MD—The invention of the Storage Compartment for Leg Supports on Wheelchair takes a practical idea and makes it an effective solution to a common question – where to store the leg supports of a wheelchair when they aren't being used. The answer is to store them in the cleverly conceived and designed Storage Compartment for Leg Supports on Wheelchair. Eliminating the aggravation of searching for the supports when they have been temporarily removed from the chair, this product would provide a heavy duty canvas storage bag that would be easily secured to the handles of the wheelchair, and an efficient home for the supports when they aren't in use.

The Storage Compartment for Leg Supports on Wheelchair was invented by Roger Facello of Baltimore, Maryland, who had this to say about the product, “My invention would provide wheelchair users with an efficient and easily accessed storage for their wheelchair leg supports. Unobtrusive and out of the way until needed, the Storage Compartment for Leg Supports on Wheelchair would provide the perfect carrying/storage place for these important parts.”
