SELF ADHESIVE HAIR EXTENSION

Self Adhesive Hair Extension is safe and easy to use...

Bolingbrook, IL—The invention of the Self Adhesive Hair Extension makes wearing natural or synthetic extensions or braids so much easier! This wefted hair extension features an integrated adhesive, giving consumers a simple and neat means of applying hair wefts to their scalp, without the use of messy glues or waxy bonding agents. This unique bonding adhesive is designed as an easily applied, flexible adhesive strip which runs the length of the top edge of the hair track, making the application of the extension secure and comfortable.

The Self Adhesive Hair Extension was invented by Agnes Yarney of Bolingbrook, Illinois who says this, “My invention would provide consumers with a quick and simple means of applying hair extensions, without the aggravation of working with the messiness of traditional glues. The Self Adhesive Hair Extension would make it possible for users to apply pieces in a fraction of the time, and with minimal fuss and frustration!”
