## **CORDLESS BLOW DRYER**

Cordless Blow Dryer provides ultimate convenience...

Chandler, AZ—Few appliances are as universally necessary as a hair dryer. Men, women, and children regularly rely on a blow dryer, justifying the large number and variety of dryers on the market. A brand new idea for a hair dryer is on the horizon, that is sure to revolutionize the entire market for blow dryers. The Cordless Blow Dryer provides the ultimate convenience and offers a dryer that is easy and uncomplicated to use. Designed as a totally portable, completely cordless hair dryer, the Cordless Blow Dryer features a full power dryer, without the aggravation of dealing with unwieldy dryer cords.

The Cordless Blow Dryer was invented by Patrice E. Broadbent of Chandler, Arizona, who had this to say about her new concept. “My invention is designed to take the hassle out of hair drying. No longer would users have to be standing within a few feet of an electrical outlet, nor would they be frustrated by the cord of the hair dryer tangling and testing their patience as they dry their hair. The Cordless Blow Dryer operates as a completely rechargeable product, making it possible to dry the hair anywhere, at any time. Consumers of all ages are sure to enjoy the freedom offered by using my innovative dryer, as well as the simplicity of dealing with a cord free product!”
