CLIP-ON ADAPTER

Makes bolt and nut removal easier...

Garden Grove, CA—The invention of the Clip-On Adapter brings a unique and handy tool that would make many tasks easier and more efficient. This specially designed adapter would be used in conjunction with modern wrenches to aid in maintaining the wrench in the engaged position on a bolt or nut. It would offer users an assist in expedient and easy removal of bolts and nuts without worrying about losing their grip.

Invented by Paul Sidoti of Garden Grove, California, the Clip-On Adapter is sure to find its way to tool boxes and work stations far and wide. According to Mr. Sidoti, “My invention is universal in design, equipped to fit all types of wrenches, and would also be made available on newly manufactured wrenches. Compact in design, this adapter would be portable and easily stored.”
