THE FOLDING T.V. STAND WITH CUP HOLDERS

Ends potential spills of soda, tea, coffee, etc.

NANTOCOKE, PA—The Folding T.V. Stand with Cup Holders is a specially designed lap table featuring incorporated cup holders. This unique tray table will provide a durable and handy device for holding beverages instead of placing cups on the floor or holding them in one's hand. The stand resembles traditional tray tables or TV stands used to accommodate one's dinner or lunch while watching TV. The legs are spring loaded allowing them to retract or extend. What sets it apart from the standard tray table are the beverage holders. They will hold up to a twenty ounce cup and are fashioned from heavy duty plastic material or a mesh to fit beverage containers of different sizes.

The Folding T.V. Stand with Cup Holders was invented by Felipe Ramos of Nantocoke, PA and Lee Apgar of Bangor, PA. They said, "In today's world, convenience is the key word and this tray table is convenient and easy to use for those who enjoy their meals in a family room or living room while watching the news or a favorite program. It ends the potential spill of soda, coffee, tea, milk or any other beverage on the floor. It works equally well outdoors on a patio and beverage lovers will appreciate the container for their drink."
