MICROPHONE COVERS

Microphone Covers provide privacy and security...

Philadelphia, PA—The invention of the Microphone Covers provide a line of decorative, concealing covers for the headset microphones used by football coaches to communicate plays and instructions from the sidelines to the field. These clever covers are designed as elliptical shields and can be emblazoned with a team's logo or insignia. Configured to fully conceal the nose, chin, and mouth of the coach, the Microphone Covers would make it impossible for an opponent's staff to read the lips of the coach as he calls plays.

Invented by Lawrence Gilliam of Philadelphia, Pennsylvania, the Microphone Covers are designed to snap easily and securely onto the microphone rod or holding ring of standard radio headsets. Commenting on his invention, Mr. Gilliam says, "The Microphone Covers are designed to be not only functional, but would also be an attractive feature of a coach's apparel and equipment when emblazoned with the team's logo. I designed this product to be used by coaches at every level, from high school to pros, a wide and receptive market."
