## **BABY ALERT**

Baby Alert provides extra safety and security...

Franklinville, NJ—Here is a product that is sure to be a must have for every family utilizing a back seat car seat for their infant or young child. The Baby Alert is the name of the product, and it does just that – alerts the driver when a little one is inadvertently left behind, still strapped into the car seat. Utilizing state of the art technology, the Baby Alert would detect that a driver had walked away from the vehicle, and immediately emit an audible and visual alert to return to the car and remove the child.

The Baby Alert was invented by Kristine Capalbo of Franklinville, New Jersey, who says this about her product, “My invention would prevent rushed parents and caregivers from unintentionally leaving behind a helpless child. While a child would never be left behind willfully, the Baby Alert ensures that this accidental catastrophe never occurs. By providing this audible and visual alert, the driver would know immediately the child had not been removed, averting a sure disaster.”
