THE HEALTHY MAT

The Healthy Mat makes the home more sanitary...

Perry Hall, MD—The invention of the Healthy Mat provides a creative concept for a specially designed door mat. This mat is uniquely constructed and treated with an antibacterial solution. The Healthy Mat would provide consumers with an ample area to wipe their feet when coming indoors from outdoors, preventing germs and bacteria from entering the home. Quickly removing dirt, rocks, grass, and an endless array of debris from the bottom of the shoes, the Healthy Mat would not only reduce the time and money spent on floor cleaning, but provide a healthier and more sanitary environment inside the home or office.

The Healthy Mat was invented by Shirley Lanehardt of Perry Hall, Maryland, who says about her product, “My invention is designed to provide an effortless antibacterial treatment to the bottom of a wearer’s shoes, making their journey inside a home or office much cleaner and more sanitary. Designed simply as a door mat, the Healthy Mat would demand no activity on the user’s part, except to thoroughly wipe their shoes on the mat before walking through the door!”
