CRIB TRANSFORMER BUNK BED ...

... a crib and single bed in one ...

BROOKLYN, NY—The Crib Transformer Bunk Bed can be easily changed from a crib into a single bed as the baby grows from an infant into a toddler. The two mattresses for the crib create one single mattress for the single bed. Also, on the single bed version, each end of the mattresses can be lifted and extra bedding can be stored within the platform frame under the mattresses. With its ergonomic design, the Crib Transformer Bunk Bed concept has a large global market potential.

The Crib Transformer Bunk Bed was invented by David A. of Brooklyn, NY. He said “ The consumer can create two versions from one design. The Crib Transformer Bunk Bed can be rotated from crib to bed and back to crib as needed for a growing family.”
