THE WIRELESS MOTORCYCLE HELMET BRAKE LIGHT ...

... increases motorcyclists' visibility.

BRONX, NY—The Wireless Motorcycle Helmet Brake Light, a wireless warning light system, is configured as an aftermarket accessory to be easily installed on motorcycle helmets and motorcycles. This product may also be incorporated into helmets at the time of manufacture. The Wireless Motorcycle Helmet Brake Light will provide motorcyclists (and those driving mopeds) an effective means of increasing their visibility.

The Wireless Motorcycle Helmet Brake Light was invented by Negel S. of Bronx, NY. He said “The Wireless Motorcycle Helmet Brake Light will allow motorists driving behind these cyclists to more easily discern their presence as darkness falls, or during inclement weather. As a result, unfortunate accidents could be prevented and serious injuries, or even deaths, easily avoided.”

EDITORS NOTE: Development of this product is being handled by Invention Resource International. For more information about licensing or sale, contact the Licensing Department at Invention Resource International, 60 E. Rio Salado Parkway, Suite 900, Tempe, AZ 85281.
