THE CONVERTIBLE SHOES ...

... have heels that can change from/flats to mid or high heels in a flash.

BROOKLYN, NY—Attention female consumers—Imagine having one pair of shoes that will give you four different styles simply by changing the heel! Convertible Shoes features three pair of interchangeable heels in order to create four styles from one pair of shoes. This is an entire line of woman's shoes produced in a wide variety of styles of pumps, sandals and boots. Convertible Shoes will be available in all sizes, colors and designs. The heel is secured and removed via a corkscrew type coil housed within the heel. The coil is controlled by way of a turn screw incorporated into the design of the heel.

The Convertible Shoes were invented by Eveter C. of Brooklyn, NY. He said, "This line of shoes allows a woman to customize her footwear for different outfits and occasions. They provide comfortable relief to tired and aching feet, especially after a long day at work wearing heels. They are great for those using public transportation to and from work and are also great for traveling when packing luggage."
