THE PULL N DAZZLE ...

... offers hours of whimsical fun for kids.

BROOKLYN, NY—The Pull N Dazzle is a spinning top toy that plays musical notes upon activation. The design intent is to provide young children, particularly those between the ages of three and ten, with a new 'classic' toy that is fun and battery-free. The device is fabricated of a combination of plastic, wood and/or metal materials. It is basically cylindrical and has four primary components.

The Pull N Dazzle was invented by Anthony C. of Brooklyn, NY. He said, “Parents and grandparents will appreciate this new toy which does not require batteries. Anyone who has bought a holiday gift for a child and seen the disappointment on their face when it won't run because there are no batteries for it will also be dazzled. Once a child has mastered the pull motion, he/she will be delighted and dazzled by the movement and the melody. It can be played anywhere and is definitely a toy classic.”
