## **THE PERFECT BEARD ...**

... is the ideal tool for flawlessly cutting a stylish beard.

JACKSON, NJ—The Perfect Beard is a line of templates that serve as a guide for grooming male facial hair. Featuring ten perfectly symmetrical designs, the intent of the Perfect Beard is to provide men with a variety of fashionable templates to work with when they shave and style their beards

The Perfect Beard was invented by Daniel T. of Jackson, NJ. He said, “This device would be great for any man who wishes to cut their beard in a stylish and fashionable manner. Basically, the Perfect Beard is a number of templates designed to be fitted to the face in preparation for cutting the beard.

Once on the face, the user could mark the design on their face with the provided white wax pencil. By doing this, the user would be able to see where they needed to cut and could attain a perfectly symmetrical beard every time they shave.

The Perfect Beard would feature a number of styles such as a full beard, a goatee with mustache, an extended goatee, a balbo, a chin strip with mustache, a regular chin strip, a soul patch, a chin curtain, mutton chops, and friendly mutton chops. This would guarantee men a great variety of symmetrical styles for their beards.”
