EDU-CLOCK ...

... is a fun and interactive way to teach telling time.

BERGEN COUNTY, NJ—The Edu-Clock, a specially designed clock with an accompanying remote control, displays and vocalizes the time of day in both analog time and digital time. With large and easy to read components, the Edu-Clock provides a fun and interactive tool to help children learn to tell time in an easy and expedient manner. Also, the Edu-Clock can vocalize and display the time in a variety of languages- English, Spanish, German, or others.

The Edu-Clock was invented by Margaret D. of Bergen County, NJ, who has an MBA degree and works in the public school system. She said, “Parents and teachers can work with a child using the Edu-Clock or a child can practice repetitive lessons independently because instant feedback is provided.”
