PORTABLE FISH CLEANING STATION

Cleaning fish is easy and neat with this unit.

DOVER, PA—Designed for cutting and cleaning fish, the Portable Fish Cleaning Station is a wheeled unit with compartments integrated on the cutting surface. It provides a convenient, portable, and effective means of cleaning and cutting fish, which can be utilized indoors and/or outdoors and can be folded for easy storage. Not only fishing enthusiasts, but also restaurants and campers may benefit from using this product.

The Portable Fish Cleaning Station was invented by Lonnie and Anna K. of Dover, PA. They said, “Eliminating the need to appropriate limited surface areas for the fish cleaning process, this practical product will provide a wide berth for this messy endeavor. As a result, kitchen counters will be free of unsavory fish residue.”
