E-Z FEEDER ...

... is a more user-friendly, convenient, and efficient way to maintain lawns and gardens.

ANAHEIM, CA—E-Z Feeder is a dispenser system to be filled with weed eradicator, pesticide, or fertilizer and configured expressly to be installed with an existing sprinkler system. This product allows for preventative maintenance as well as the administration of food and water for vegetation, all automatically, from one centralized location. E-Z Feeder will be appreciated by lawn and garden enthusiasts as well as professional lawn care service providers and maintenance crews for commercial establishments.

The E-Z Feeder was invented by Guy I. of Anaheim, CA. He said, “E-Z Feeder will allow gardeners to avoid dragging around awkward and cumbersome weed killer and fertilizer sprayers while attending to these tasks. Every time your sprinklers turn on, your lawn and gardens get a fresh fertilizing or weed eradicating application.”

EDITORS NOTE: Development of this product is being handled by Invention Resource International. For more information about licensing or sale, contact the Licensing Department at Invention Resource International, 60 E. Rio Salado Parkway, Suite 900, Tempe, AZ 85281.
