THE G SCREEN & G1 SCREEN ...

... protects engine intake from bird strikes and other objects.

WASHINGTON, D.C.—To Federal & global aviation administrations along with the various military's, airline owners, and airline companies around the world. The G Screen & G1Screen is a protective guard to be installed over an airplane's main engines. This product would prevent bird strikes and other objects from entering the engine and disabling it. The G Screen and G1 Screen incorporate a defrosting system. The G Screen is for private and commercial aircraft and the G1 Screen is designed for military aircraft. Today air transportation is a vital part of our lives and any manner, which provides safety, has impact to our lives on a global scale.

Eric L. of Washington, D.C..invented the G Screen & G1 Screen. The invention of “The G Screen & G1 Screen will effectively prevent bird strikes from occurring while protecting the integrity of the engine. Another benefit beside guarding against infiltration by bird strikes is the device would begin to heat up when ambient air reaches 35° thus preventing the engines from icing over before ambient temperature reaches the freezing point. Plane occupants as well as those operating the vehicles will benefit from this invention.”
