THE SNIFFER ...

... is a simple, easy, and efficient way to maintain a fresh, sanitary bathroom.

ROSENBERG, TX—The Sniffer, a vacuum exhaust system and diffuser secured between the rim and seat of a toilet bowl, provides an easy way to keep bathrooms free of unpleasant odors and unsanitary matter from toilets. In addition to removing odors, it also suctions away and helps eliminate many of the microscopic germs and bacteria from waste matter which can infiltrate the bathroom each time the toilet is flushed. Simple to install and reasonably priced, The Sniffer is an invaluable accessory not only for homes, but also for business establishments, restaurants, travel plazas, and other locations.

The patent pending The Sniffer was invented by Pilar P. Mottu, Jr. of Rosenberg, TX, who said, “Effectively eliminating unpleasant odors before one enters a bathroom, The Sniffer ensures a much more inviting environment. Also, bathroom surfaces, countertops, and the items stored on these surfaces, such as toothbrushes, remain germ free even when the toilet is flushed with the lid open. Additionally, this product offers an alternative to costly air fresheners which only mask odors. Another advantage is that surfaces wouldn't have to be scrubbed down every time the toilet is used.”
