THE AUTOMATIC ELECTRONIC PILL CRUSHER …

… helps nursing staff crush pills (when required) while distributing a patient's meds.

BURBANK, CA—Attention—nurses who are responsible for delivering medications! Here is the perfect tool to help administer medications for healthcare professionals in hospitals, nursing homes, assisted-living facilities and those who provide home health-care to the elderly and disabled. The Automatic Electronic Pill Crusher makes for a quick conversion of a pill form medication into powder form needed for certain patients. With a port at the top, for the insertion of the pill(s) to be crushed, and a release port at the bottom for pouring the powdered medication into a cup, the Automatic Electronic Pill Crusher is ideal for use by health-care professionals. It is compact and oval in shape and powered by a single AA or AAA battery contained in a snap-cap compartment.

The Patent Pending Automatic Electronic Pill Crusher was invented by Tanya S. of Burbank, CA. She said, “It is amazing just how difficult it can be to crush medications. I am an RN (Registered Nurse) and I knew this device would work. The Automatic Electronic Pill Crusher is compact and lightweight, portable and powered by batteries. It is the ideal tool to easily convert pill-form meds into powder form.”
