THE SET & FORGET MOUSE TRAP ...

...offers a cruelty free alternative to glue or snap traps.

BALTIMORE, MD— The Set & Forget Mouse Trap emits a visual and audible alert when a mouse has been captured yet it presents no serious harm, injury or prolonged death to the rodent. The Set & Forget Mouse Trap is a cruelty free alternative to traditional snap or glue traps. It is rectangular and approximately 3¼”H x 7”L x 3”W. It is enclosed on five sides and the front end features a hinged access door held open by a trigger activated prop with bait placed at the distal end. It is activated when a mouse walks into the trap and the door falls shut. Power is supplied to the trap via a standard 9 volt battery. The electronic alarm is mounted on the exterior and provides both a flashing red light and an audible alert.

The Set & Forget Mouse Trap was invented by David Y. of Baltimore, MD. He said, “This is an unusual trap for mice in that it is an affordable alternative to those currently in the marketplace as it causes no pain to the rodent yet provides a method to remove them from your house or garage. The Set & Forget Mouse Trap is a hassle free trap and the rodent(s) can be released far away from the home or business. It is safe to use around children and pets too. It is particularly useful in public places such as a restaurant, hotel, motel, hospital or nursing home where onlookers sometimes could glimpse a typical trap holding a rodent. No one has to deal with a dead mouse when using the Set & Forget Mouse Trap.”
