## **THE SUPER SNOOZER**

...is an aid for sufferers of OSP(Obstructive Sleep Apnea)

BALTIMORE, MD—If you or a family member suffers from Obstructive Sleep Apnea (OSA), a disorder in which there is partial or complete obstruction of the upper airway when asleep, you know the drill. Typical symptoms of Obstructive Sleep Apnea are daytime sleepiness, awakening with a choking sensation, morning headache, restlessness at night and of course snoring. People who suffer from this disorder will appreciate and benefit from the portable recharge utility of the Super Snoozer. It is a small sleek device and case with a less obtrusive profile with tubing connected in the back and a hidden water chamber. It has lighted primary touch controls for power, ramp and C-Flex as well as a LCD display and controls for advanced reporting and setup. The water chamber is easy to remove, fill and replace and delivers continuous humidification throughout the night. It has a timer that one can utilize for a power nap too.

The Super Snoozer was invented by Valerie J. of Baltimore, MD. She said, “If by chance the electric goes off in a storm or for any other reason, the user still can feel comfortable to sleep safely. This battery powered machine helps users sleep safely when electricity is not available. The Super Snoozer is great to use on trips where CPAP (Continuous Positive Airway Pressure) machine plugs are not easily accessible.”
