## **THE EASY LANGUAGE VOCABULARY LEARNING...**

...aids in learning Spanish and other foreign languages.

BROOKLYN, NY—The only word missing in this product name is the word tool. The Easy Language Vocabulary Learning is a specially designed learning tool configured in the form of an alphabet wheel and designed to build both reading and vocabulary skills. The initial product is designed to teach Spanish but this tool can be modified to teach virtually any language. It is considered an alphabet on wheels and the two dimensional wheel features a cutout window which reveals specific words and images. Each letter of the given alphabet and pictures for word association for each letter is on the wheel.

The Easy Language Vocabulary Learning was invented by Surbyn M. of Brooklyn, NY. She said, “There are few individuals who do not wish they had the ability to be bi-lingual. The Easy Language Vocabulary Learning is a tool which helps to build reading and language skills. In today’s world knowing more than one language opens our mind to interact, communicate and understand other people. With a simple spin of the wheel this device aids a young child to improve their vocabulary. It works well for teachers and care providers and is a valuable tool in the home too. I have a prototype which works exceptionally well.”
