THE MESSAGE PACK ...

... provides soothing back massage.

BALTIMORE, MD— The Message Pack is a specially designed personal massage unit that is configured in the form of a backpack. It is easy to put on and will provide the user with a simple means of a soothing back massage. This personal massage rests flush against the back similar to the way a back pack fits. The massage unit itself is a rectangular shaped unit designed to encompass the back completely. This electronic unit comes in a standard size as well as a variety of sizes to accommodate various body types and sizes. The underside that rests against the body features a series of rolling massagers designed to move up and down the unit, thus massaging the upper and lower back, shoulders and the spinal column. Adjustable shoulder straps are positioned on either side of the unit and secure the Message Pack in place.

The Message Pack was invented by Casey B. of Baltimore, MD. She said, “The Message Pack straps to the back of the user and allows the consumer to have a soothing back massage without calling on help from others. It helps to relieve muscle tension and offers a practical way to enjoy an invigorating massage, anytime, anywhere and without the need for a massage therapist or friend to administer treatment.”
