THE SCENTED VACUUM BAGS

Allows scent to linger long after vacuuming is done.

TOMS RIVER, NJ—Vacuuming is a job that leaves the floors, furniture and walls clean and free of dust and dirt but not always smelling ‘fresh’. The disposable Scented Vacuum Bags however have small air freshener crystals infused with pleasing fragrances. They are designed to prevent odors from flourishing within the bag while at the same time infuse the home with fresh clean scents when using the vacuum cleaner. The air freshener crystals are activated during the vacuuming process and release a long-lasting scent that lingers in the air. A variety of scents will be available in the bags such as spring flowers, ocean breezes and baby fresh are just a few of the aromatherapy fragrances including eucalyptus, frankincense, lavender, sandalwood and rose.

The Scented Vacuum Bags were invented by Burkhardt F. of Toms River, NJ. He said, “The various scents provided in these bags will linger long after the house is vacuumed and are great in a motor home or a vehicle as well as in office environments. The Scented Vacuum Bags are safe to use around children and pets too.
