THE REMOTE CONTROL FRONT DOOR LOCK ...

... provides convenient and efficient keyless home security for the user.

BROOKLYN, NY—In today's world we have become thoroughly accustomed to using remote to lock and unlock our vehicles. It is a helpful tool in cold wet weather and certainly in late dark hours. The same would be true of a remote device to lock and unlock the entrance door of our homes. And, happily enough, here it is! The Remote Control Front Door Lock is a transmitting and receiving system that is specially designed to be used in conjunction with the front door of a residence. The design intent is to enhance home security and convenience by providing consumers with a means of keyless entry and exit.

The Patent Pending Remote Control Front Door Lock was invented by Angela R/M of Brooklyn, NY who said, "Safety, security and convenience are three major reasons I designed the Remote Control Front Door Lock. It is automatic and combines the security of a deadbolt with the convenience of a remote control. Who could or would ask for anything more? It is perfect for live-alones, teens and senior adults as well as any other adult residents. It features a sophisticated electronic system along with the possibility of thumb print recognition. It eliminates the frustration often associated with fumbling of keys...best of all, it works!"
