CHOPSTICK BOWL OF VARIOUS SIZES & DESIGNS

Each chopstick bowl incorporates a secure chopstick “resting area”.

HIGHLAND, CA—Lovers of Asian food will quickly recognize the benefits of the Chopstick Bowl of Various Sizes & Designs. This product line of attractive and functional bowls in a variety of materials, sizes, and designs — each of which is designed to secure or display a pair of chopsticks — will be a welcome benefit to diners who prefer to eat their food with chopsticks. The built-in “chopstick rest” allows the user to place their tools in a secure area when taking a short break while eating. The various bowls will be finished with a variety of paints and/or glazes and produced in a wide variety of patterns and colors. The bowls may be sold individually or in sets.

The Patent Pending Chopstick Bowl of Various Sizes & Designs was invented by Nanczi Greenwood of Highland, CA who said, “Finally a design that every diner will appreciate. This line of bowls with the Chopstick “Rest” has been a long time coming. It specifically allows diners to place the chopsticks into the designated areas and prevents them from rolling off the table or being knocked to the floor. They are ideal for all diners and will be appreciated by guests in restaurants, catering services, parties and at home. They work perfectly. The Chopstick Bowl of Various Sizes & Designs will be treasured as collectible items too. People collect chopsticks and some are very expensive. My Chopstick Bowl is a perfect and uniquely beautiful way to display their collections.”
