CAR SEAT COVER

Car Seat Cover protects little fingers and hands...

Beaumont, CA— The invention of the Car Seat Cover offers a creative concept for a soft fabric covering to be easily applied to an infant or toddler car seat. The Car Seat Cover is designed to provide parents and caregivers with a simple means of keeping the seat's hardware, especially the safety harness and buckle, cool and safe to the touch when the vehicle is parked for extended periods in the hot sun.

The Car Seat Cover was invented by Erin J. of Beaumont, California. She said, "My invention is designed to protect a small child from being burned by car seat hardware that has become scalding hot to the touch. The Car Seat Cover will keep the hardware cool, ensuring that the child can be placed into their car seat without discomfort and injury."
