QUICK-GLIDE APPLICATOR

Quick-Glide Applicator simplifies organization...

Homewood, IL— The invention of the Quick-Glide Applicator offers an innovative concept for a container, lid, and adjustable brush system that is combined into one convenient unit. The Quick-Glide Applicator is designed to provide a simple and effective means of managing brushes and paint containers without multiple tools and eliminating messy transporting of supplies.

The Quick-Glide Applicator was invented by Lawrence W. of Homewood, Illinois. He said, “My invention is designed to provide an efficient means of properly storing and managing multiple paint supplies. Eliminating the hassle of digging through a jumble of brushes to find the proper size for a job, and ending the aggravation of attempting to return a paint brush to its original package for storage, the Quick-Glide Applicator would prove an invaluable aid to do-it-yourselfers, as well as professional painters.”
