FIRST AID SAFETY HELMET

First Aid Safety Helmet is practical and convenient...

Bronx, NY— The invention of the First Aid Safety Helmet offers a creative concept for a first aid kit that is specially designed to be secured to the interior of a work helmet. The First Aid Safety Helmet would provide construction workers, contractors, and do-it-yourselfers with an easily accessed means of caring for minor injuries when on the job.

The First Aid Safety Helmet was invented by Randy Z. of Bronx, New York. He said, “My invention is designed as a practical rubber or foam pouch with a supply of first aid supplies neatly packed inside. Bandages, antiseptic ointment, and other necessary items would be quickly available, making response time to minor on the job injuries much quicker, and reducing down time when an accident occurs. The First Aid Safety Helmet would quickly become a favorite of contractors and site supervisors.”
