NO CLEAN UP DISPOSABLE COOKWARE ...

...for one-time-use.

CHICAGO, IL—The No Clean Up Disposable Cookware is a specially designed one-time-use liner for pots, pans and skillets with the design intent to provide consumers with a kitchen accessory that facilitates the cooking of food items and eliminates the daunting cleanup tasks. The product protects the surfaces of nonstick cookware during meal preparation. It is made of lightweight aluminum material and produced in a myriad of sizes and style to accommodate the majority of pans, skillets, stew pots, casserole dishes and other types of baking dishes. Lidded versions will also be available. Standard versions of the No Clean Up Disposable Cookware are primarily circular or square and have raised side walls to encompass the entire pot or pan.

The No Clean Up Disposable Cookware was invented by Gregory P. of Chicago, IL. He said, “No one should be forced to clean up dirty cookware after a long day of fixing food for a group of family or friends and the No Clean Up Disposable Cookware solves that possibility. The No Clean Up Disposable Cookware serves to protect the surface of delicate cookware from scratches or marks and provides these dishes to remain new for years. They are easy to use and anyone who enjoys cooking will appreciate and benefit from using them every time they are busy fixing a meal. It is also a great time saver when on camping trips. They work equally well in restaurants and other fine dining establishments.”
