## **THE EZ ZIP STORAGE CONTAINER ...**

... replaces individual containers and is easy to use & store.

NORTHERN CAMBRIA, PA—The EZ Zip Storage Container is a line of plastic storage receptacles featuring a solid base and a zippered enclosure. The design intent of the EZ Zip Storage Container is to provide consumers with a more practical alternative to individual bowls and bags. The product line is made of durable plastic see-through material and has the easy open/close feature of the bags currently in the marketplace. The line consists of a range of sizes from small to large and/or extra large in order to facilitate the needs of the user. The disposable/reusable container combines the durability of a plastic bowl with the convenience of a zipper opener/closer. The zip lock top is easy to use and seals the contents with ease too.

The EZ Zip Storage Container was invented by Elaine D. of Northern Cambria, PA.. She said, “These storage containers were designed with convenience in mind and to fit the needs of every household, but they can work equally well for those in the food and commercial industry. They are ideal for everyday household storage need for a variety of items not limited to food.”
