THE SHOULDER RADZ! ...

...football jerseys with simulated shoulder pads for wear by fans.

SURPRISE, AZ— Are you a dedicated and avid football fan? If you answer yes, you will love the new jersey shirts with an unusual touch. Shoulder Radz ! are football jerseys with simulated shoulder pads to be worn by football enthusiasts. They resemble a football jersey worn by team members. Each jersey features 'simulated' shoulder pads located on the underside of the jersey. These foam rubber pads mimic a pro player's uniform. They are fabricated of semi-rigid foam rubber and are sewn into the jersey but can also be attached and removed with Velcro® fasteners. The sizes range from children to adults extra large.

The Shoulder Radz ! was invented by Clark W. of Surprise, AZ. He said, "These jerseys are designed to represent various professional football teams, however the design can also be used for high school and college teams. These jerseys will allow fans to show off their favorite team or by displaying a certain number on their shirt celebrate their favorite player on a team. If an individual is an ultimate football fan, the Shoulder Radz ! is a perfect example of expressive gear to wear to a game or after the game for that matter."
