THE JADA FRANKLIN CUSTOM AUTO TOY VEHICLE ...

...is a luxury ride-on-toy vehicle for both kids and adults.

IRVINGTON, NJ—Jada Franklin Custom Autos are a line of ride-on-toy vehicles modeled after luxury cars. The cars are remote controlled by adults and will provide children with a fun and entertaining means of mobility. They are designed for children who weigh 60 pounds or less. Cars are fabricated of a heavy duty durable plastic and stainless steel components. Doors will open and close for easy access. The interior has one or two bucket seats with synthetic leather. The accessories include a 'bra' and cargo cover. A remote controlled stereo system with four speakers will operate within the vehicle. The Jada Franklin Custom Auto Toy Vehicle plays DVD movies also and is IPod ready. The cars all have working headlights and taillights, plus a third brake light and they each have durable tires to run on hard surfaces. Add-on stickers let kids customize their vehicle. These lines of vehicles receive power via a standard 12-volt rechargeable system.

The Jada Franklin Custom Auto Toy Vehicle was invented by John F. of Irvington, NJ. He said, "The Jada Franklin Custom Auto is a neat vehicle which both kids and adults will find fun and entertaining. They are completely powered by an adult and are perfect for young kids who haven't yet mastered pedaling or steering. It is a truly safe and secure means of enjoying mobility for those young kids in your home."
