THE HOLIDAY BUTTER MOLDS ...

...for the perfect setting on your holiday table.

SAINT CHARLES, IL—If you want to make your guests feel they have attended an extra special dinner party during the holidays, then you may benefit from using the Holiday Butter Molds. These are a line of decorative molds with which to create whimsically shaped spreads for individual or group use. They are guaranteed to impress and are a great accent on any table for any celebration. Manufactured of malleable plastic or rubber material and are three-dimensional which are open at the top for use in easily filling with a favorite butter spread. The molds come in single single serving size for use at formal place settings and larger molds are designed to serve to an entire family or group. The Holiday Butter Molds are produced in a myriad of fun and festive shapes and are designed to mold butter into these shapes but also can be used to shape cheese spreads, dips and other side dishes.

The Holiday Butter Molds were invented by Janice S. of St. Charles, IL. She said, “The table settings of Executive (or home) Chefs will be admired when the Holiday Butter Molds are used. The bread, bun, or croissant will never taste as good as when spread with this delightful and unusual butter! Guests will feel just special when confronted with this decorative butter mold on their bread plate.”
