THE HEALTH COMB ...

... teachers & parents declare war on lice w/this new comb!

AVONDALE, PA—Every school nurse or administrator dreads the time when their students are facing a breakout of that horrendous bug—head lice. This event is traumatic for everyone. An infestation can often take weeks and weeks to overcome. The Health Comb, an electrically operated comb which effectively kills head lice on contact and aids all users in putting a swift end to the outbreak. The Health Comb, at maximum temperature, will be hot enough to kill both lice and nits yet it will not burn the scalp.

The Health Comb was invented by Donna S. of Avondale, PA. She said, “The Health Comb is of great benefit to parents who suffer, along with their kids, lice outbreaks in schools. These parasites seem to come along regardless of one’s personal grooming and hygiene but The Health Comb, used along with medicinal formulas is an effective tool in preventing the spread of lice. It is an important tool for caregivers all around the world when fighting this type of parasite.”
