BIKE TIRE WASHER

Bike Tire Washer preserves the life of the tire...

Audubon, MN— The invention of the Bike Tire Washer offers a creative concept for a motorized brush and roller that is housed in a basin, providing an efficient way to clean bicycle tires without a lot of hassle and mess. Not only would using this innovative product help preserve the life of the tire, it would also enhance the overall look of the bicycle by making the tires look new again.

The Bike Tire Washer was invented by Mark R. of Audubon, Minnesota. He said, “My invention is designed to offer bicyclists, bike shop owners, bicycle courier services, and beach and resort bike rental services with a bicycle tire cleaning device that would offer convenience and outstanding results. Using the Bike Tire Washer will help to preserve the life of the tire. By spraying the tire as it turns and allowing the tire or rubber product that you choose to penetrate the surface, using the Bike Tire Washer will make the tire look brand new.”
