SWEAT NO MORE BODY FANS

Sweat No More Body Fans help you keep your cool...

Philadelphia, PA— Here's an invention that will keep you cool and comfortable in the hottest environments! The invention of the Sweat No More Body Fans offers a creative concept for small, motorized fans that can be positioned directly below the underarm area of a garment. The Sweat No More Body Fans are designed to provide consumers with a simple means of staying cool and dry when wearing suit jackets or uniforms.

The Sweat No More Body Fans were invented by Tony B. Jr. and Tony B., Sr. of Philadelphia, PA. They state, "Our invention is designed to provide consumers with an easy and efficient means of maintaining cool comfort when wearing dress, business attire, or a uniform in a hot environment. Simple to use, the Sweat No More Body Fan's cooling unit would be easily activated, circulating air over the upper body, enabling the user to stay comfortable and dry."
