THE SHOE BOOT DRIVING PROTECTOR

The Shoe Boot Driving Protector

Lansdale, PA— The invention of The Shoe Boot Driving Protector offers a creative concept for a line of coverings that are specially designed to be worn over the heel of a shoe or boot. This unique product is configured to perfectly protect the shoe from being scuffed while driving. It also protects the soles of the shoes from scuffing. Adhering easily and comfortably over the footwear, The Shoe Boot Driving Protector is perfect for anyone who drives a motor vehicle.

The Shoe Boot Driving Protector was invented by Lynwood H. of Lansdale, Pennsylvania. He said, “My invention is designed to protect shoes from the damage caused by constant rubbing and friction on the side, heel, and sole of footwear when driving. Not only for household drivers and commuters, The Shoe Boot Driving Protector would be ideal for truck drivers, taxi drivers, police offers, and bus drivers.”
